- Rapid publication times: max. 2 weeks from acceptance to online publication
- Free publication of color figures both in online and print editions; no page charges
- Open Access publication option available

Aims and Scope

Drug Metabolism and Personalized Therapy provides up-to-date Research Articles, Reviews and Opinion Papers in the wide field of drug metabolism research, covering established, new and potential drugs, environmentally toxic chemicals, the mechanisms by which drugs may interact with each other and with biological systems, and the pharmacological and toxicological consequences of these interactions and drug metabolism and excretion. Areas covered include: drug metabolizing enzymes, pharmacogenetics and pharmacogenomics, biochemical pharmacology, molecular pathology, clinical pharmacology, pharmacokinetics and drug-drug interactions, immunopharmacology, and neuropsychopharmacology. The *Journal* also features Short Communications, Letters to the Editor, Case Reports, and Editorials. *Drug Metabolism and Personalized Therapy* is the official journal of the European Society of Pharmacogenomics and Personalised Therapy (ESPT).
